

SAFETY PRECAUTIONS AND DIRECTIONS FOR SHELLCRACKER USAGE

- 1). The Design of the ShellCracker requires low muzzle velocity, as a result, the over- powder wad may stick in the barrel of the gun. Check barrel of the gun after each ShellCracker is fired to assure there is no blockage.
- 2). Ear, Hand, and Eye Protection Devices *must be worn* while using the ShellCracker.
- 3). The ShellCracker can cause fire if used improperly, Check for flammable material down range before firing.
- 4). **WARNING:** It is dangerous to place a 12-gauge shells in a larger gauge gun.

CAUTION: It is dangerous to fire the ShellCracker from a molded plastic flare pistol, or in a gun with a chamber shorter than 2 3/4 inches. Do not use the ShellCracker in a gun with a barrel shorter than 20 inches.

- 5). For best results, the ShellCracker should be used within one year from the date on the box.
- 6). For the best operating results, use a **CLEAN GUN** in *good operating condition* and *one without a full choke*.
- 7). The ShellCracker is designed for bird and animal scaring, any other use is strictly prohibited by law.

NEVER FIRE THE SHELLCRACKER AT ANOTHER INDIVIDUAL.

- 8). **ADVISORY:** In addition to item #3, we recommend that the gun barrel be at a 45degree angle or greater while firing the ShellCracker.
- 9). The ShellCracker must be stored in the original packaging in a cool, dry, and **SECURE** (under lock and key) location. Inventory control must be maintained for these shells. **KEEP FIRE AWAY!**
- 10). In addition to the above safety precautions, standard gun safety and handling procedures should be followed. These shells should only be used by persons experienced in gun safety and handling.
